Vegetable Seed Trials

SEASON OF 1932

GENERAL DIRECTIONS

ORDER EARLY. We request our customers to order as early as possible on receipt of catalogue. We endeavor to ship all orders immediately on receipt, but during the busy season it is almost impossible; hence, the importance of ordering early.

Orders for Bulbs, Plants and Nursery Stock will be shipped in due time for planting in season.

PARCELS POST. We deliver free by Parcels Post all seeds, when cash accompanies the order, except Farm Seeds or Clovers. If these are wanted by mail, please add the cost of postage at zone rates.

Fertilizers, insecticides, sundries, trees and plants are, at all times, except as stated below, excluded from free delivery.

No charge for delivery to railroad station, steamer or express office.

SPECIAL NOTICE. We deliver free by Parcels Post, Express or Freight (at our option) all Fertilizers, Insecticides or Garden Sundries on all orders value \$3.00 or over, when cash accompanies the order, within a radius of 50 miles of New York City.

ESTATE SUPERINTENDENTS, GARDENERS AND FARMERS. Parties requiring the services of reliable men, married or single, should consult with us, as we have the names of a number on our register, thoroughly experienced in every branch of the business. We have a large acquaintance among gardeners in this vicinity, and it is seldom that anyone who applies to us fails of getting the right party. There is no charge for this service.

SPECIAL NOTICE—PRICES

The prices published in this catalogue are subject to market changes without notice. Owing to the fluctuating market in prices of all materials, we cannot bind ourselves on prices of any articles.

Payment. All orders should be accompanied by cash in the form of Draft, Cheque or P. O. Order. Owing to the difficulty in collecting accounts, no order will be attended to unless accompanied by remittance from parties unknown to us or those whose accounts remain unsettled.

C. O. D. SHIPMENTS. We are always pleased to supply seeds to be paid for on delivery. Bulbs, Plants, Fertilizers, Insecticides and Perishable Stock will not be sent C. O. D. unless 50 per cent cash accompanies the order.

WE ISSUE THE FOLLOWING CATALOGUES AND SPECIAL LISTS

BULB CATALOGUE. Ready about July 1st, containing a complete list of all bulbs for Fall planting and greenhouse forcing.

Season
1932

IN presenting our thirtieth annual spring catalogue, we again thank our many patrons for their continued support, and in doing so we feel most confident that we can again guarantee the same high quality in seeds and bulbs that has proved emblematic of our efforts in the past.

It has been our endeavor, in keeping with the times, to reduce prices wherever possible without resorting to quality sacrifice and we trust you will bear this important factor in mind when making selections.

We invite those interested to visit our establishment in New York City as shown above and our lily field in Long Island as charted below and where at both places they will meet experienced representatives who would offer every assistance in the selection of types with proper cultural advice.

LILY ESTABLISHMENT

We extend an invitation, to all who are interested in **HARDY LILIES**, to visit our **LILY FIELD** and **TRIAL GROUNDS** at Syosset, Long Island, N. Y., where about **ONE HUNDRED THOUSAND LILY BULBS** have been planted and where during the months from early June until October there will appear a wonderful display of **LILIES** blooming in regular succession in about **ONE HUNDRED VARIETIES**. Our salesmen will be in attendance during the entire period.

First inspect the show plot at the entrance to the Syosset Nurseries, then follow the arrows to the **LILY FIELD** in the rear.

MARSHALL'S LAWN GRASS SEEDS

Marshall's Lawn Grass Seeds have given universal satisfaction for the past 30 years and are used on many of the largest estates in every section of the country for making the best lawns. Our mixtures contain only the best grades of re-cleaned grasses, blended in proportions to give quick and permanent results.

MARSHALL'S "SPECIAL" LAWN GRASS MIXTURE

Marshall's "Special" Lawn Grass Mixture produces a perfect as well as permanent, lawn of luxuriant richness. It quickly forms a closely interwoven, firm and elastic turf ready for cutting in about 6 weeks from time of sowing. This "Special" mixture is the result of years of experimenting and is composed of the proper proportions of fine-leaved, deep rooting, perennial grasses which will thrive under varied conditions of soil and climate; maintaining a succession of growth during the different seasons of the year, thus insuring a rich, deep green, smooth and velvety lawn, free from clumps.

This is a scientifically blended mixture, containing only the highest grade of re-cleaned seeds of Red Top, Kentucky Blue, Chewings' Fescue, and Perennial Rye grasses, blended in proper quantities.

Price: Lb. 60c., 5 lbs. \$2.75, 20 lbs. \$10.00, 100 lbs. \$50.00.

Delivered Transportation Paid when cash accompanies the order.

MARSHALL'S "CENTRAL PARK" LAWN GRASS MIXTURE

Marshall's "Central Park" Lawn Grass Mixture still maintains a high place in the esteem of those who desire an even, dense growth of permanent sward very early in the season. This mixture contains no annual grasses so detrimental to a permanently good lawn. Only grasses of lasting value and extreme hardiness are used in this popular mixture and we exercise great care to use only the purest seed in the proper proportions in its blending. This mixture is recommended to those who desire a popular priced mixture for average conditions and requirements.

Our Central Park Mixture is prepared from our own formula and must not be confused with many mixtures that are sold under this name. It is composed of only the best re-cleaned seeds, containing Kentucky Blue, Fancy Red Top, Fescue, Perennial Rye and a small quantity of White Clover, all blended to warrant perfect results.

1 lb. will sow a plot 15 x 15 ft.; 3½ lbs., 25 x 40 ft. (1,000 sq. ft.); 150 lbs., 1 acre (43,565 sq. ft.).

Price: Lb. 50c., 5 lbs. \$2.25, 20 lbs. \$8.00, 100 lbs. \$40.00.

Delivered transportation prepaid when cash accompanies the order.

For best results use Marshall's Lawn Dressing for new and old lawns.

THE LAWN. The latest and best knowledge on the making and upkeep of lawns. By L. S. Dickinson. \$1.25, Postpaid.

MARSHALL'S "SHADY PLACE" LAWN GRASS MIXTURE

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places; for sowing in such places we recommend the use of this special mixture. It will quickly produce an abundant and even growth of beautiful green grass. The grasses used in making this special mixture are only those adapted for growing in shade. It has been successfully used on some large operations where a green sward was desired on land partially shaded by old trees.

Price: Lb. 60c., 5 lbs. \$2.75, bu. 20 lbs. \$10.00, 100 lbs. \$50.00.

SPECIAL LAWN GRASS MIXTURE FOR SEASIDE LAWNS

A mixture of fine grasses peculiarly suited to seaside lawns and very sandy soils.

Price: Lb. 55c., 5 lbs. \$2.50, 20 lbs. \$9.00, 100 lbs. \$45.00.

MARSHALL'S "TERRACE" LAWN GRASS MIXTURE

A special mixture of grasses for sowing on terraces and side hills—grasses that produce strong, spreading roots, thus preventing heavy rain from washing them out; that will withstand drought and exposure, thrive on shallow soils and produce a rich, green turf throughout the season.

Price: Lb. 65c., 5 lbs. \$3.00, bu. 20 lbs. \$11.00, 100 lbs. \$55.00.

MARSHALL'S ALL BENT FORMULA LAWN GRASS

For many years Bent Grasses have been used for Putting Greens with great popularity and recently many are using them for lawns with perfect results. Our mixture contains only Bent Grasses in variety.

Price: Lb. \$2.00, 5 lbs. \$9.50, 20 lbs. \$37.50.

MARSHALL'S CHEWING'S FESCUE FORMULA LAWN GRASS

To procure an exceptionally fine lawn that will withstand drought and other adverse conditions, we recommend this mixture. It is composed of Chewing's Fescue, various Bents and a small proportion of Red Top. These grasses will give a wonderful dark green texture and combined with their spreading habit and thick growth will give a velvety appearance throughout the Summer and Fall.

Price: Lb. \$1.00, 5 lbs. \$4.50, 20 lbs. \$17.50.

MARSHALL'S MATCHLESS LAWN DRESSING

The proper feeding of grass is a matter of great importance in good lawn making and maintenance. Health and vigor of grass depend upon the use of a well balanced fertilizer. Matchless Lawn Dressing is odorless and contains each of the three elements, namely, nitrogen, phosphates and potash, which are necessary for the proper growth of grass. For new lawn use 4 pounds per 100 square feet. On existing lawns use the same quantity twice yearly, Spring and Fall.

Price: 100 lb. bag \$5.50, 500 lbs. \$27.50, 1,000 lbs. \$50.00.

Delivered transportation paid, when cash accompanies the order, within a radius of 50 miles of New York.

Permanent Grass Mixtures for Golf Links

MARSHALL'S "PUTTING GREEN," or "TENNIS COURT" MIXTURE

A very carefully prepared mixture for use on putting greens, croquet lawns, tennis courts, bowling greens and lawns. This mixture produces a very thick, soft growth, when sown on a well-prepared ground, and mowed short will allow a ball to roll in almost a direct line. We especially recommend this mixture to those who are particular to obtain the very best. Our mixture contains only the very fine-bladed species of grasses without Rye Grass. 25 lbs. will seed a putting green 75 feet square.

Price: 5 lbs. \$4.50, 20 lbs. \$16.00, 100 lbs. \$80.00.

MARSHALL'S FAIR GREEN MIXTURE

Marshall's Fair Green Mixture is composed mainly of perennial native grasses and two very important European grasses which have proven of great value for Fair Green use. They are all of dwarf, spreading growth, forming a close velvety surface which improves from year to year if given proper care.

This mixture contains no Clover but will be added if desired in quantity of one-half pound per bushel of grass seed. Sow 150 lbs. per acre.

Price: 20 lbs. \$8.00, 100 lbs. \$40.00.

MARSHALL'S POLO FIELD MIXTURE

This mixture is composed of deep rooting grasses that will form an enduring turf and stand the roughest usage. Sow at the rate of 150 to 200 lbs. per acre.

Price: 25 lbs. \$12.50, 100 lbs. \$50.00.

Grass for Hay Crops and Pastures

MIXTURES FOR HAY AND PERMANENT PASTURES

The results obtained from our special Grass Seed mixtures are well known by the constantly increasing demand for them. Fall seeding is preferable, but Spring sowing will be successful if done early, while the land is cool and moist. In addition to the Grasses, we advise sowing 10 lbs. of Mixed Clover Seed per acre.

We recommend sowing 50 lbs. to the acre.

PERMANENT PASTURE MIXTURE No. 1. For cool and light soils.

PERMANENT PASTURE MIXTURE No. 2. For medium soils.

PERMANENT PASTURE MIXTURE No. 3. For heavy soils.

Prices of any of the above Mixtures, 10 lbs. \$4.50, 100 lbs. \$40.00.

Bent, Rhode Island (<i>Agrostis Tenuis</i>). Makes a fine dark green turf, of good color and fine texture.....	2.00	17.00	150.00
Blue Grass, Canadian (<i>Poa compressa</i>). Adapted to the poorest and driest soils. Fine for pastures but not suited for lawns owing to its less pleasing color...	.40	3.50	32.00
Blue Grass, Kentucky (<i>Poa pratensis</i>). One of the most valuable native grasses for lawns and pastures. Succeeds well on all good soils. Weight per bus. 20 lbs.....	.45	4.00	35.00
Fescue, Chewing's New Zealand. Adapted to practically all conditions, making a fine compact turf of dark green color and resistant to hard wear. Weight per bus. 20 lbs.....	.70	6.50	60.00
Fescue, Hard (<i>Festuca duriuscula</i>). A slender, densely tufted perennial grass, 1 to 2 ft. high. Thrives on dry, sandy soils. Weight per bus. 14 lbs.....	.50	4.50	40.00
Fescue, Red (<i>Festuca Rubra</i>). A deep rooting grass suitable for lawns in poor and sandy soils. It resists drought and will thrive in shady places.....	.70	6.50	60.00
Fescue, Sheep (<i>Festuca ovina</i>). A small tufted, hardy grass, of value in mixture for lawns or dry soil.....	.50	4.50	40.00
Fescue, Meadow, or English Blue Grass (<i>Festuca pratensis</i>). Root creeping; perennial; flowers in July; one of the most valuable of the Fescue grasses. This grass is well adapted for permanent pastures. It grows rapidly in rich and rather moist soils and makes excellent pasture grass, its long, tender leaves being much relished by cattle. It should always be mixed with other grasses35	3.00	25.00
Orchard Grass. A good grass for hay crop, yielding nearly the same amount as Timothy and almost equal in feeding value. Orchard Grass will grow on almost every soil. It prefers a moderately dry soil with considerable sandy material. One of the best grasses for sowing in shady places and among fruit trees in orchards. 35 to 40 lbs. required for one acre. Weight per bus. 14 lbs.....	.35	3.00	25.00
Red Top, Fancy Cleaned (<i>Agrostis vulgaris</i>). A highly recommended grass for permanent pasture and as meadow grass for hay. Red Top is especially valuable for sour and acid soils, and meadow lands. Red Top makes one of the best grasses for lawn use, either sown alone or in connection with White Clover, or in a mixture with other grasses. Use 14 to 16 lbs. to acre. Weight per bus. 30 lbs.....	.40	3.50	30.00
Rye Grass, Domestic. A mixture of English and Italian Rye Grasses, grown in the United States, and used for a nurse for lawn grasses and where immediate results are wanted. Extensively used in the South for turf.....	.30	2.50	15.00
Rye Grass, Italian (<i>Lolium italicum</i>). It is a very rapid grower, forms a dense turf, and is regarded as an excellent hay grass. Weight per bus. 20 lbs.....	.30	2.50	20.00
Rye Grass (Pacey's). A carefully selected, short-seeded, dwarf-growing strain, suitable for lawns.....	.30	2.50	22.00
Rough Stalked Meadow Grass (<i>Poa trivialis</i>). A spreading, stoloniferous rooted grass. Adapted for shady lawns and pasture mixtures.....	.65	6.00	50.00
Timothy, or Herb Grass (<i>Phleum pratense</i>). The standard hay of commerce. The excellent quality of the hay and the ease of culture make it valuable. It is adapted to most soils, but succeeds best on moist loam and clay. Timothy sown alone requires about 20 lbs. per acre; when sown with Red Clover use 15 lbs. Timothy and 5 lbs. Red Clover. Weight per bus. 45 lbs.....	.20	1.50	12.00
Wood Meadow Grass (<i>Poa nemoralis</i>). Excellent for shaded positions in lawns and woodland parks. Very hardy, resisting extremes of heat and cold.....	1.50	13.00	120.00

Prices subject to market changes.

Novelties and Specialties in Flower Seeds

Nasturtium, New Double, Golden Gleam

ANTIRRHINUM "Marshall's Rock Hybrids." An extremely dwarf strain. Blooming most profusely, they have a highly decorative effect in rock and alpine gardens. Early flowering. In mixture containing shades of rose, pink, purple, mauve and bicolors. Per packet 50c.

BROWALLIA *Viscosa compacta Sapphire.* The very straggling habit of *Browallia viscosa* has always been a drawback, but our new form is a wonderfully compact little plant, not over 9 or 10 inches high, bearing sometimes over a hundred dark blue flowers with eye suggesting a large-flowered *Lobelia*. Commencing to bloom in July, it is of exceptional value for conservatory decoration. Per packet 35c.

DELPHINIUM "Wrexham" Hybrids. Though no longer to be included in the category of novelties this superior strain of "hardy Larkspur" so far outclasses all other types, that we again wish to focus the attention of flower lovers on it. Massive broad based spires in many gorgeous shades. Our Wrexham strain is rapidly replacing the various other types hitherto offered, as the last word in Delphiniums. Wrexham Delphiniums are at their best silhouetted against a clump of *Lilium Candidum*. Per packet \$2.00. 1/8 oz. \$5.00.

DIANTHUS *Alwoodii Alpinus.* A very beautiful little perennial *Dianthus*, flowering the first year from seed. It is only four to six inches high, semi-double flowers of all *Dianthus* colors. A perfect gem for rock gardens or for edging borders. Per packet \$1.00.

FELICIA *Bergeriana.* Tufted grass-like foliage from which emerge masses of small blue star-shaped flowers. A really pretty annual of unique beauty. Per packet 35c.

HELIOPHILA *Leptophylla.* This is an excellent plant for pots and borders, more compact than *H. lineifolia* and bearing larger flowers quite half an inch across. These are of a bright blue intensified toward the centre, with clear white eye. It is very floriferous and for the border should be planted 9 to 12 inches apart. Per packet 35c.

LUPINUS *Mrs. Nicol Walker.* A new "Regel" variety. The color resembles that of a freshly opened Pomegranet, being of a rich Indian-red and deep yellow. Per packet \$1.50.

LUPIN *Northern Torchlight.* A beautiful warm carmine and cherry red, maintaining its glowing color right through the spike. Up to the present the nearest approach to scarlet. Per packet 75c.

NASTURTIUM *Golden Gleam. New Double Sweet Scented.* The plant forms a vigorous bush which throws out short runners averaging eighteen inches. As soon as it nears development, the entire plant including the runners is a blaze of color. The large golden-yellow flowers average two and one-half inches across, standing well above the foliage on stiff stems six inches in length. We consider this a remarkable Novelty. Per packet 25c., oz. \$2.50.

PANSY "Marshall's Apricot Bedder." Here we offer a splendid bedding Pansy of large size and of exceptionally fine color which is best described as a rich deep apricot deepening towards the center. This, grown in conjunction with Giant Pansy "King of the Blacks" (offered on Page 22) will provide an uncommonly beautiful color combination. Per packet 50c.

FLOWER SEED SPECIALTIES—Continued

POPPY **Iceland. Sanford's Giant.** Mammoth flowers 5 inches across with strong wiry stems comprising all colors known in the annual Shirley poppy. Per packet \$1.50.

URSINIA **Anethoides.** A very attractive annual, being easy to grow and is very showy for cutting or garden decoration. The Daisy-like flowers are rich orange in color with a ring of deep purple at the base. Per packet 50c.

VERBENA **New Dwarf "Compact Fireball."** A compact Verbena growing about 6 inches high, literally covered with bright scarlet blossoms. Excellent for borders or pot plants. Per packet 50c.

VENIDIUM **Fastuosum.** A half hardy South African annual with flowers of brilliant orange with dark center and black-purple zone. Sown in February, will bloom indoors by the middle of May or outdoors in July. 2 to 3 feet. Per packet 50c.

NEW and DISTINCTIVE PLANTS and BULBS

ANGELONIA SALICARIAEFOLIA

A most fascinating tender perennial which may be used as a pot plant, but experience has proven it to be a most desirable bedding plant. It will bloom consistently throughout the season, will endure excessive drought and, on the other hand, has withstood heavy rain storms. The plant is well branched and festooned with Gloxina-like blossoms of purplish blue with white throats. Will bloom its best when grown in poor soil. Plants from 2½ in. pots, \$4.00 per doz., \$25.00 per 100.

CARNATION **Giant Laddie.** The color of this wonderful Carnation is three shades darker than Laddie, and the flower is far superior in every respect. It produces 95% perfect flowers during the winter months, 4½ to 5 inches across, on tall, strong, stiff stems. Rooted cuttings. 25 for \$20.00, 100 \$75.00. Not less than 25 sold. January or later delivery.

CORNUS KOUSA CHINENSIS

(Chinese Dogwood). This beautiful rare white Dogwood has all the good qualities of the Japanese variety, but the individual flowers are very large and are produced in great abundance in May, and continue to bloom for a long period. Trees, 3 to 4 feet, \$6.50 each.

CHRYSANTHEMUM **New Early "Aladdin."** This new variety has all the good qualities of the late flowering varieties and has attracted much attention at the recent flower shows. The color is a warm bronze with an overlay of orange apricot. Unlike most hardy Chrysanthemums this new variety does not seem to object to hot weather and full sunshine. The blooming time for Aladdin has been given as August, although flowers often come earlier, sometimes in the middle of July. It will make a good substitute for Asters in localities where they are hard to grow. Shipments made in Spring. Plants from 3 in. pots. \$9.00 for 10, \$80.00 per 100. 25 at the 100 rate.

LILIUM **Wallacei.** For some years we have been developing a stock of this scarce Lily and now we are in a position to supply a large quantity of flowering bulbs at greatly reduced prices. When all other dwarf Lilies have long gone out of bloom this beautiful Lily will break into blossom about Sept. 1st from Spring planted bulbs and about Aug. 15th from Fall planting. The color is somewhat lighter than shown in our book "Consider the Lilies" and may be described as a deep apricot with dark spots in center. The bulbs we offer have three to four crowns and should produce as many flower stems. Each 40c., doz. \$5.00, 100 \$30.00. Postage paid. 25 bulbs sold at 100 rate.

Chrysanthemum Aladdin

PYRACANTHA **coccinea lalandi** (Evergreen Firethorn). A beautiful evergreen irregular branched shrub, prized principally for the profusion of bright orange-red berries which remain on the plant all Winter. It is most attractive planted against a wall as a climber, or can be used in groups. A brilliant touch to the Winter landscape. Exceptionally strong plants, three feet high, from 7 in. pots \$5.00 each.

ROSE **The New Dawn** (The Everblooming Dr. W. Van Fleet). The first plant patented under new patent law. U. S. Patent No. 1. This new Rose is identical in every way with its parent in size and formation of flower, color, etc., but blooms continuously throughout the Summer and Fall months. 2 year field grown plants. Each \$2.00.

TRITOMA **Rufa Hybrids.** Charming hybrids of this new race of Tritomas varying in color from all shades of red and yellow to white. The flowers are smaller and more dainty than the old Tritoma; they make excellent cut flowers. Very free flowering blooming from June until frost. 3 for \$1.50, 10 for \$4.00, 100 \$35.00.

Marshall's Matchless Flower Seeds

ALL FLOWER SEEDS ARE MAILED FREE AT PACKET, OUNCE AND POUND RATE TO ANY POST OFFICE IN THE UNITED STATES

The following list contains a most complete assortment of the choicest and most popular flowers for either conservatory, greenhouse or garden culture.

Annuals grow from seed, flower, mature their seed, and die in one year, or, in other words, the same season.

Hardy Annuals are those which can be sown in the open ground.

Half-Hardy Annuals are those which should be started early in the house, conservatory or hotbed, and transplanted to the garden in settled warm weather.

Biennials grow from seed, sown from June to August, ripen their seed and die the next year, though some varieties bloom the same season if sown early in gentle heat.

Hardy Biennials will winter in the open ground without protection.

Perennials grow from seed, and continue flowering annually for many years after the first season. Some varieties flower the first season if planted early in gentle heat.

Half-Hardy Biennials require the protection of a coldframe or cool house during Winter.

Hardy Perennials can remain in the open ground during Winter without protection.

Half-Hardy Perennials require the protection of a coldframe or cool house during the Winter.

Tender or Greenhouse Perennials require window or greenhouse culture, free from frost during Winter and thrive in the garden during the warm months.

ASTERS

Plants from seeds sown in the open ground in May bloom finely in September and October, when the flowers are seen at their best. For July and August flowers, sow in March or April, in cold-frame, spent hotbed, or pots and boxes in the house. Cover the seeds about half an inch deep with rich, light soil, and when the plants have three or four leaves, transplant about 18 inches apart each way into well prepared beds.

WILD GARDEN FLOWER SEEDS

This mixture contains over 100 varieties of the oddest and choicest annual imaginable. For naturalizing purposes or sowing broadcast, nothing approaches wild garden flower seeds for effect and cheapness. No care is necessary, and a never-ending succession of bloom and fragrance can be obtained throughout the entire Summer and Fall. Pkt. 10c., oz. 25c., ¼ lb. 75c.

Marshall's Early Flowering Spencer Sweet Peas

The Early Flowering Spencers bloom about two weeks earlier than the late flowering varieties when grown under congenial conditions. The flowers are beautifully waved and produced on long stems, four flowers predominating on each stem. For winter flowering under glass or in the Southern states they far surpass the Late Spencers. When grown in the open ground they will usually bloom in about 100 days after planting.

CUPID, or DWARF SWEET PEAS

These grow about 9 inches high and are adapted for borders or beds.

Finest Mixed Colors. Pkt. 10c., oz. 30c., ¼ lb. \$1.00

Sweet Peas and Flower Seeds treated with "SEMESAN" will give better germination.

MARSHALL'S SPENCER SWEET PEAS

There are no Annual Climbers that are more popular or more universally admired than Sweet Peas. They are of the easiest culture, unrivaled for cutting, delightfully fragrant, while their colors are amongst the brightest and daintiest in the floral world. As soon as the ground can be worked in the Spring, sow the seed in trenches at least 6 inches in depth, then as the plants grow fill in the soil about one inch at a time until the trenches are full, taking care not to cover the young plants. Liquid manure applied occasionally will be found very beneficial. Pick the flowers frequently, for if allowed to form seed the plants will stop blooming.

The following is a selection of the best varieties in each color.

Austin Frederick Improved: Large pure lavender.
Avalanche: Extra large white, good form.
Barbara: An unusually good salmon shade.
Carmelita: Rose pink on white ground.
Charming: Brilliant deep rose. Choice.
Chieftain: A superb shade of deep mauve.
Commander Goddall: Lovely violet-blue.
Crimson King: Striking shade of ox-blood crimson. A superb color.
Daffodil: Large flowers of deep primrose.
Dora: A chaste sort with standards of soft pink; cream wings.
Doreen: Fine shade of carmine. Large.
Flamingo: Orange, scarlet, flushed cerise.
Fortune: A fine purple blue. Unusual.
Glencagles: An exhibition sort with extra fine flowers of pale blue-lavender.
Hawthorn Cerise: Bright salmon cerise.
Hawthorn Salmon Pink: Fine rose pink flushed with salmon pink.
Hero: An exceptional shade of cerise.
Huntsman: A new shade of scarlet.
Idyl: A stunning shade of salmon pink.
Kitty Pierce: Light lilac, suffused pink.
Mammoth: Orange scarlet. A telling color.
Mary Pickford: Lovely cream pink suffused salmon pink.
Model: A black seeded white of fine size and texture.
Mrs. Tom Jones: Lovely deep amethyst blue.
Olympia: Rich Tyrian purple.
Pinkie: Largest size rose pink. Extra fine.
Powerscourt: Still one of the best of the large size lavenders.
Prince of Orange: A fine flower of deep rich orange.
Reflection: One of the best in a clear shade of blue.
Rosabelle: A giant flower of fine deep rose.
Royal Pink: Shrimp pink, veined orange.
Splendor: A rich maroon.
Sunkist: Large cream picotee edge rose.
Supreme: An exhibition flower of large size, fine substance. Flesh pink.
Tangerine Improved: A very good salmon-orange.
The Prince: Clear crimson flowers of large size and good substance.
The Sultan: Large glossy black maroon.
Valentine: Blush pink flowers of large size.
What Joy: Primrose yellow shading to cream.
Wembley: A superior lavender blue.
White Spencer: A pure white which is hard to improve upon.
Youth: White with a picotee edge of rose.

ARTICHOKE

One ounce will sow 100 feet of row, and produce about 500 plants.

A rich, sandy loam is best adapted for this plant. The seed should be sown in drills $1\frac{1}{2}$ inches deep and 1 foot apart. Transplant to rows 3 feet apart. They reach maturity the second year. Protect in Winter by a covering of leaves or coarse manure.

Large French Globe. Heads large, fleshy and of rich flavor. Pkt. 25c., $\frac{1}{2}$ oz. 60c., oz. \$1.00.

ARTICHOKE PLANTS

Large French Globe. Plants ready for shipment after April 1st. Doz. \$2.50, 100 \$20.00.

Jerusalem. Grown for the tubers, which resemble Potatoes, and are cultivated in a similar manner, but the rows should be at least 4 feet apart. Qt. 40c., peck \$2.50.

ASPARAGUS

One ounce will produce about 200 plants.

Sow in Autumn or in Spring as soon as the soil is in good working condition. At one or two years transplant to permanent beds.

ASPARAGUS ROOTS

It requires 100 plants for a single row of 150 feet.

Culture.—The permanent bed should be trenched or ploughed very deeply, and well manured with rich, thoroughly decayed manure. Set the plants 18 inches apart in rows, carefully spreading out and separating the roots and deep enough to admit of the top of the plants being covered 6 inches. In November the plants should have their annual top-dressing of manure after the stalks have been cleared away.

BEANS

Beans like a well drained, rich and light loam. Plant about the middle of April when warm and favorable, and at intervals throughout the season for a succession, until the latter part of August. Bush varieties should be planted in drills 2 feet apart, and from two to six plants to the foot in a row. Keep them well cultivated and draw the earth up to the stem. For String Beans gather the pods as soon as fit for use.

DWARF SHELL BEANS

Sow in drills 2 feet apart as soon as warm weather has set in; soil should be light and rich; covering beans with about 2 inches of soil.

POLE, OR RUNNING BEANS

Sow from the 1st of May (for all except Limas) to the latter part of May, in hills 4 feet each way. Limas should not be planted until warm weather has fairly set in. One quart of Limas will plant about 100 hills, allowing four or five beans to a hill, and of the smaller sorts about 200 hills. Poles 8 to 10 feet long should be firmly set in the hills before planting seed. Set poles 4 feet apart each way, and plant 4 to 6 beans about 1 inch deep around each pole. Thin out to three plants to a pole if the soil is rich; pinch off the ends of plants when they overrun the top of the poles, to effect more perfect growth below.

Semesan is the most effective all-purpose disinfectant on the market. The use of this compound, either in dust or liquid form, not only provides control of disease, but hastens and improves seed germination. Its use provides vigorous growth in the seedling stage, thereby insuring sturdier plants and, as a result, heavier and better production.

Semesan controls organic diseases such as "damping off" and "stem rot." If you have had only fair success with your gardening activities try **Semesan** and you will always use it. Descriptive booklets on request.

Prices: 2 oz. 60c., 1 lb. \$2.75, 5 lbs. \$13.00. Postage extra.

LETTUCE

One ounce will sow 200 feet of drill.

Sow in the open ground as early as possible, barely covering the seed. If the hotbed is used let it be started quite early. Give but little heat and plenty of water and air on fine days. Let plants in the beds be about 4 inches apart. As they increase in size thin them out or they will become weak. Plant for late use in a cool, partially shaded place in rich soil.

Parsley Crested Gem

MUSHROOM SPAWN

Ten pounds will spawn about 10 feet square.

Mushroom beds may be made in a warm, dry cellar, or in any building where the frost does not penetrate and in the open air during the Summer and Fall months. Having procured the spawn, the next thing to be attended to is to make preparation for the beds. About two or three weeks before the beds are to be made collect a quantity of fresh horse manure without the straw; place it in a heap under cover, and as it heats keep turning it over once or twice a week, until the fiery heat has become exhausted, which will require from ten to fourteen days' time. When the manure is in a condition to be made up lay out your bed, according to your requirements, say 3 feet wide, 10 feet long and from 2 to 3 feet deep; beat it down well with the back of the spade as the process of building goes on. When the bed has been made some time, say a week or thereabouts, and the heat sufficiently declined to a temperature of 65 or 75 degrees, the spawn may be put into it. Break the spawn in pieces 2 inches square, and put them 6 inches apart, all over the bed; then cover the bed with 2 inches of rich soil. If everything goes on well, you may expect Mushrooms in about five or six weeks. When the soil looks dry give a gentle watering with tepid water, using a rose on the watering pot. Good crops of Mushrooms can be obtained by spawning the hotbeds in Spring.

Pure Culture Prolific Direct Bricks. An American-made spawn which produces large crops of large size, deep cream and excellent quality Mushrooms. Per brick, 45c.; 10 bricks for \$3.50; 50 bricks, 15.00.

PARSNIP

One ounce will sow 200 feet of drill.

Sow Parsnip seed as early in the Spring as the weather will permit, in drills from 15 to 18 inches apart, covering with fine soil to the depth of half an inch. The soil should be rich and deep; manured if possible, the previous Autumn. Thin out the young plants to about 6 inches apart and keep the surface of the ground open and free from weeds. It is perfectly hardy and may remain in the ground through the Winter. Indeed, the fine sugary flavor is only perfected by a severe frost.

ONIONS

One ounce will sow 200 feet of drill. 4 to 5 pounds to the acre.

Sow in drills 1 foot apart and cover about one-third of an inch, treading or rolling after sowing so that the hot, dry atmosphere may not destroy the sprouting seed. When 3 inches high thin to 2 inches apart. Stir the ground freely without disturbing the young plants and keep free from weeds.

PEAS

One quart will plant about 150 feet of drill.

Peas mature earliest in a light, rich soil; for general crop a rich loam is the best. When grown in gardens sow in double rows 6 to 8 inches apart, the rows 2 to 4 feet apart, the tall ones requiring brush. Commence sowing the extra early varieties as early as the ground can be worked in February or March and continue for a succession every two weeks until July.

POTATOES

GROWN EXPRESSLY FOR SEED IN MAINE OR PRINCE EDWARD ISLAND

Peck will plant 100 foot row. Ten bushels cut tubers will plant 1 acre.

The Potato can be grown with varying success on soils of all kinds and in all conditions of fertility, but the soil best suited to it is a sandy loam. Manure is applied either in rows or hills or broadcast over the hills and ploughed in. In highly enriched soils the plants are more liable to disease than when grown in soil that is naturally good. Plant as early in Spring as the ground can be had in fair working order, in hills or ridges, about 3 feet apart, cover lightly with soil about 4 inches deep.

Beauty of Hebron. Slightly flesh colored skin, with pure white flesh; very productive and of the finest quality.

Bovee. Extra early; fine quality; flesh white.

Dibble's Russet. This is the best main crop Potato in cultivation. The tubers are round to oblong in shape, good size, white flesh and covered with a russet skin. The quality when cooked cannot be excelled. It also has great disease-resistant and blightproof properties.

Early Rose or Spaulding Rose. Very early; fine quality; very productive, skin shaded rose color.

Gold Coin. Very productive, fine table quality; flesh pure white and cooks very dry.

Green Mountain. Oval shape; white skin and flesh; heavy yielder and good for Winter use.

Irish Cobbler. One of the best extra early varieties.

At the time of going to press with this catalogue the Potato market is so unsettled that prices are subject to change.

We request those desiring Seed Potatoes to write for prices on the quantities wanted and we will give quotations by mail.

Unpriced orders will be filled at the prevailing market prices at time of shipment. Potatoes are forwarded by express or freight as directed, purchaser paying charges.

Semesan. Potatoes treated with Semesan will be free from disease and yield much larger crops.

SWEET POTATO PLANTS

Red or Yellow variety. Plants ready end of May. Per 100, \$1.00; 1,000, \$7.00.

PUMPKIN

One ounce will plant 50 hills.

The common practice is to drop two or three seeds in every second or third hill in the Cornfield, but if cultivated on a large scale the seed may be sown in hills 8 feet apart each way, four plants to each hill, and otherwise treated in the same manner as Melons or Cucumbers.

RADISH

One ounce of seed will sow 150 feet of drill.

Radishes require a light, loamy soil, moderately fertile, which should be deeply dug and well pulverized. The situation should be warm and sheltered. For an early supply sow in January or February in botbeds, keeping well ventilated. In May they may be sown out-of-doors. Successive sowings should be made every two weeks. Radishes to be crisp and tender should make a rapid growth.

Winter varieties should be sown in July and August.

Dahlia Rosette

ROSETTE DAHLIAS

Miniature Decorative Dahlias

Here we offer a distinctly different class of Dahlias than those listed elsewhere. They have aptly been called the "vest pocket" editions of the huge flowering decorative types. Compact and sturdy in habit, they are perfect gems for cutting and no collection of Dahlias can be considered complete without a quota of these charming miniatures. We think so highly of them that we have made a colored plate of some of the best.

ENGLISH CHARM DAHLIAS

Miniature Dahlias of Peony-flowered Type

The newest type from Europe. They form bushy plants, 2½ to 3½ feet in height and are literally covered with flowers all season. The medium sized, semi-double blooms are carried on rigid, wire-like stems well above the foliage, making ideal garden plants. As cut flowers they are superb, keeping fresh in water for many days.

POMPOM DAHLIAS

Pompom Dahlias, long forgotten and neglected, have staged a "come back" and the reception accorded them by the visitors to our exhibit at the last New York Dahlia Show augurs well for their popularity. Easier to grow than their larger kindred, giving more prodigally of their brilliant blooms, they will be found most useful either as a cut flower or for permanent decoration. Being of rather dwarf growth they require very little support and disbudding is quite unnecessary. The popular prices of these little beauties will enable all lovers of flowers to grow a wide selection of varieties.

Varieties marked * are small or exhibition flowers, under 2 inches in diam.

Dahlias from Seed

Wonderful Dahlias may be grown from seed and they will bloom the first season, making as large plants and tubers as if grown from bulbs. Bear in mind that each seedling will be a new variety. This makes it the most fascinating part of growing Dahlias. They are seldom like the parent plant in type or color. All the fancy Dahlias of today were grown from seed. Many of them were produced by seed grown by amateurs and sold to growers at fancy prices.

Growing Dahlias from seed is one of the most interesting stages of Dahlia cultivation. Our seed is carefully selected from the choicest varieties. We send postpaid to any post office in the United States, Dahlia seeds in packets.

We are offering \$50.00 for the best seedling grown from this seed and shown at the A. D. S. Show, 1932.

First Prize, \$25.00; Second Prize, \$15.00;
 Third Prize, \$10.00.

GLADIOLUS

There are no other Summer-flowering bulbs so satisfactory, needing so little attention and thriving so well in almost any ordinary soil as the Gladiolus. Set the bulbs from 3 to 6 inches apart in rows, or for massing 6 inches apart, and about 4 inches deep.

Our selection has been made from many varieties and includes all those of exceptional merit and a wide range of colors.

GLADIOLUS FOR LATE PLANTING

Gladiolus can be had in flower in late September and October if the bulbs are retarded in cold storage.

We are prepared to place in cold storage any varieties if ordered before the middle of April and ship at any date required for later planting.

Gladiolus bulbs dipped in a solution of **Semesan** will prevent hard rot and other diseases.

GLADIOLUS by F. F. Rockwell

The suggestions on how and where to use "Glad's" and types and varieties will be helpful in making out orders. The chapters on care and culture, increasing the stock, creating new varieties, growing and exhibition, and harvesting and storing, will bring pleasure and success throughout the growing season. **Price, postpaid, \$1.00.**

HARDY LILIES

Among the stateliest of all hardy plants, Lilies during their respective flowering seasons, constitute the chief attraction in the hardy border. They prefer a well-drained soil, and should remain undisturbed for years. In the Autumn give the bulbs a heavy mulching of leaves; coarse manure or straw will prove highly beneficial. Plant all Lilies as early as possible in the Spring.

Marshall's Spring Collection of Hardy Lilies

We have prepared the following collection of five varieties of Lilies that can be planted in Spring and that are positively sure of providing a continuous bloom from June to late September the first year if planting directions are followed in the book "**Consider the Lilies**."

Three large flowering bulbs of each of the following (15 bulbs in all):

Henryi, Regale, Speciosum Rubrum Melpomene, Umbellatum Grandiflorum, Wallacei.

The above Collection, valued at \$7.05, mailed free for \$5.00.

In addition to this generous offer we will include the beautiful book "**Consider the Lilies**" as described below. This valuable book will be mailed immediately on receipt of \$5.00 for the Lily Collection. The bulbs will follow at proper time for planting.

A total value of \$8.05 for \$5.00, mailed free.

Note.—Those who are already in possession of "Consider the Lilies" and do not desire another copy, will receive one bulb of *L. Auratum platyphyllum* if requested.

Lilium Henryi

"Consider the Lilies"

The first edition of our book "**Consider the Lilies**" was accepted by the world's greatest horticulturists as one of the most interesting, authentic, and glorified treatises on Lilies ever published.

The Second Edition (now ready) surpasses its predecessor in every way. More descriptive and cultural matter has been added, several new varieties have been included, and pictures of the most delightful old and interesting new types are gloriously and truthfully reproduced in natural colors.

No expense has been spared, no effort shirked in its compilation; it is a book that every recipient will read and frequently refer to for authentic information on the Great Family of Lilies.

The above book will be sent postpaid to any address in the United States upon receipt of \$1.00. Upon request it will be sent FREE with orders for Lilies amounting to \$3.00 or more.

Lily Show Garden

We welcome visitors to our show garden where Lilies may be seen in bloom from June until October. This garden is located in Syosset, L. I., on Jackson Avenue, a quarter of a mile south of Syosset Station and about half way between the Jericho Turnpike and the R. R. Station. It is located next to the Syosset Nurseries. A large planting of our Lilies may also be seen on the grounds of the Syosset Nurseries. See Page 1 for directions on how to reach the Lily field.

COLD STORAGE LILIES

For Greenhouse Forcing

We have in Cold Storage bulbs of the following Lilies available for shipment during the summer for late planting or greenhouse forcing.

LILIUM AURATUM PLATYPHYLLUM

Bulbs, 9-11 in. circum., 25 for \$15.00, 100 \$55.00
Bulbs, 11-13 in. circum., 25 for \$20.00, 100 \$75.00

LILIUM FORMOSUM

(THE ERABU, BLACK-STEMMED VARIETY)

We consider this variety most suitable for forcing into bloom in the early Fall, as these bulbs keep in excellent condition until about July 1st.

Bulbs, 11-13 in. circum., 25 for \$20.00, 100 \$75.00
Not less than 25 sold. 50 at 100 rate.

LILIUM REGALE

After trials with this popular Lily we are convinced that it has the merits that no other Lily has for rapid forcing. The bulbs may be taken from cold storage, placed in a temperature of 60 and brought into flower in 60 days. The fragrant, white blooms show a tint of pink on the outside of the petals and a sulphur shading inside.

Bulbs, 7-9 in. circum.....25 for \$16.00, 100 \$ 60.00
Bulbs, 9-10 in. circum.....25 for 22.00, 100 80.00
Bulbs, 10-12 in. circum....25 for 28.00, 100 105.00

Not less than 25 sold. 50 at the 100 rate.

Liliium Sulphureum

LILIUM SINENSIS PLURATUM

A new variety resembling Formosum in the individual flowers which are produced in profusion, from 3 to 4 spikes coming from one bulb. An excellent Lily for cold storage purposes.

Bulbs, 9-10 in. circum.....25 for \$17.00, 100 \$ 65.00

LILIUM SPECIOSUM

RUBRUM MAGNIFICUM or MELPOMENE

The favorite Lily for forcing into bloom for Christmas and during the Winter months.

Bulbs, 11-13 in. circum.....25 for \$22.00, 100 \$ 70.00

Bulbs, 13-15 in. circum. Supply limited.....25 for 32.50, 100 105.00

Not less than 25 sold. 50 at the 100 rate.

LILIUM SULPHUREUM

We have experimented with the beautiful Lily and find it is an excellent variety for cold storage and bringing into flower in the winter months.

Bulbs, 8-10 in. circum.....Doz. \$20.00, 25 for \$38.00, 100 \$140.00

LILIES FROM SEED

Lilies may be grown from seed and flowering bulbs may be produced by this process in two years time. Seeds of many varieties remain in the ground for one year before showing any signs of germination, while others will sprout in a few weeks.

In sowing seed in the open ground, Spring is a suitable time; although time may be gained by sowing the newly collected seed in Fall, using well rotted leaf mold as a covering. In this case germination should appear in Spring. Frost has no detrimental effect on seed and in some cases frost is an aid to germination.

The seed bed should be prepared by using sandy loam with an addition of well rotted leaf mold. Sow thinly in drills a half inch deep. When bulblets have been formed they should be transplanted and planted deeper. For greenhouse cultivation the same method may be followed by sowing in flats and the bulblets transplanted into the open ground when large enough.

WATER LILIES

We are pleased to announce that we are again in a position to offer large plants of water lilies. These large plants insure a longer blooming period, many of them bearing developed flower buds when shipped. We stress the fact that these are large roots and are packed and shipped in sphagnum moss.

TROPICAL DAY BLOOMING WATER LILIES

Garden lovers are fast becoming acquainted with the superiority of the Tropical Water Lily over the old time Hardy Water Lily. The fragrant tropical blooms, with their great variety in color and shade, are larger and much more numerous than any of the Hardy variety. Their long stiff stems not only add to their beauty in the pool, but make excellent cut flowers.

HERBACEOUS PERENNIALS AND ROCK GARDEN PLANTS

Perennials, never more popular than today, comprise most of the best flowers and make a foundation for any garden. They exist in infinite variety and provide a succession of flowers in every conceivable hue from early Spring to late Fall and range in size from the tiniest edging material to the tall plants suitable for a background.

For the best effect it is essential to plant in groups. We are therefore continuing to offer perennials in quantities of not less than three of one variety as satisfactory results cannot be obtained by using one plant of a kind.

Varieties marked * are suitable for rock gardens.

Seeds of Plants for Rock Gardens

Being frequently asked to recommend seeds of plants not necessarily alpinines—suitable for use in American rock gardens, we have compiled the following lists for ready reference. All those offered are of easy culture and can be relied upon to give greater general satisfaction than is usually obtained with the rarer and more difficult alpinines.

While the veteran rock gardener may decry the use of annuals in the rock garden, we stress their utility for making a quick showing either in temporarily replacing losses or for immediate effect in newly constructed rock gardens.

ROSES

HYBRID TEA, OR EVERBLOOMING

This selection will produce a mass of Roses to cut from, the entire season. The plants are two-year-old, and the varieties are the very best for outdoor culture; invaluable either for display or cutting and are hardy with protection.

Being almost as hardy as the June Roses, they can be treated in a similar way with regard to pruning.

All strong, two-year-old field grown plants, \$1.00 each, \$9.00 for 10.

SUGGESTIONS FOR SPRING PLANTING OF ROSES

The soil should be thoroughly cultivated and a liberal supply of rotted manure added. In planting, dig a hole sufficiently large to accommodate the roots when spread out on the bottom of the hole. In filling in the soil, shake the plant lightly in order that the soil may mix between the roots. Fill in the soil and firm it in order that the plant may be solid. Be sure to see that the lower parts of the lower branches are below the surface of the soil. Do not plant in a mound, the surface should be level. Cut back the branches to within 4 to 6 inches of the surface of the ground. With this treatment the best results may be obtained.

Marshall's Trained Fruit Trees

Specially Budded on "Dwarfing" Under Stocks

We issue a special folder on Trained Fruit Trees—Sent upon request

In our constant effort to offer "Everything good for every good garden," we have made arrangements with a specialist to grow trained fruit trees for us.

We issue a special folder on the training, pruning and care of these trained fruit trees. A copy will be mailed to anyone requesting same. Our list illustrates some of the types grown and also gives particulars of the varieties in which they may be obtained.

FRUIT TREES

Planting.—Make the holes large enough to admit the roots without cramping or bending, and deep enough to set the trees to their natural depth. Fine surface soil should be used for covering the roots, and this should be carefully mixed among them. If the ground is dry, it is well to pour in some water when the hole is partially filled. See that the ground is firmly and solidly packed over all parts of the roots. Fill the holes full enough to be even with the surrounding surface after the fresh earth settles. Never use manure in contact with the roots.

WHEELBARROW LEAF-RACK

Can be attached to any style or size wheelbarrow with removable sides. Most convenient for gathering leaves, cut grass and rubbish. One of these attachments should be in use on every small suburban place, as well as the larger estates. Capacity 10 bushels; made of galvanized wire, with wood base to stand on wheelbarrow. Each \$9.00.

PORTABLE REFUSE BURNERS

A portable steel furnace for the rapid and convenient destruction of all leaves, refuse and waste matter. In reality a two-wheeled hand cart (for which purpose it can also be used), made of strong steel angle iron and heavy steel netting, which is fireproof and guaranteed not to burn out. It is fitted with broad-tired wheels, which enable it to be pulled along with the cleaning up squad on lawns or soft ground without injury. A strong steel pan is fitted under the axle, which catches all the fire and ashes as they fall through the bottom. This pan can be easily emptied as needed.

Against the cost of hauling the leaves and rubbish to a convenient spot for burning, the leaf burner will pay for itself twice over in one season.
